INPUT/OUTPUT
CONFIGURATIONS

Anystation 4K & Anystation Media

Up to 8 outputs in 4K: Ideal for high-resolution projections, video walls, and immersive installations.

Seamless Performance: Optimized for smooth playback and perfect synchronization across all outputs.

Versatile Use: Perfect for advanced AV projects requiring high-quality video output.

Media: 3rd party mediaserver software (e.g. PIXERA)

Anystation HD

Up to 16 WUXGA outputs:

Handles large-scale installations with ease, providing superior performance for expansive setups.

Ultimate Flexibility: Supports multiple projectors, LED walls, and other display configurations without compromise.

Preinstalled software

VIOSO 6: Automates and optimizes complex projection setups with advanced warping and blending.

EXAPLAY: Provides smooth, high-resolution video playback, supporting the latest GPU-based codecs.
